Project

OBSTACLE AVOIDANCE ROBOT:
A device which can automatically sense the obstacle infront of it and allows the robot to navigate in unknown environment by avoiding collisions.Here we used Arduino UNO and Ultrasonic sensor to detect the path and calculate the distance between robot and object.Applications:military.

Workshops

- Underwent **UAV Technology** conducted by AVIAN AEROSPACE on 10/08/2018 to 11/08/2018.
- Underwent hands on session on **DEEP LEARNING** in Velammal Institute of Technology on 11/02/2020 to 12/02/2020.

Inplant Training

*Underwent inplant training in INTEGRAL COACH FACTORY Chennai from 29/11/2019 to 06/12/2019.

Achievements

- Won third position in State level Quiz competition conducted by Aalim Muhammed Engineering College.
- Won first place in Quiz Competition by Reach Academy.
